Substance: Iron Sinter and Iron Ores, Agglomerates [pellets]

Dear Members of the SIEFS for Iron Sinter [Einecs number 265-997-9, CAS number 65996-66-9] and Iron Ores, Agglomerates [pellets, Einecs number 265-996-3, CAS number 65996-65-8]:

Further to our emails of July 11th and 19th 2010, we regret to advise that we have made further modifications to the guidance documents on analytical methods for sinter and pellets. It became clear that it would be necessary for each member registrant to submit its own XRD spectrum for these substances. We again apologise for any inconvenience caused. Links to the updated documents are given below.

We will soon be issuing guidance documents on completion of sections 1 and 3 of the IUCLID 5 dossier by member registrants which we hope will clarify the process.
