

HOW TO MOVE FROM IRON, FURNACE TO IRON

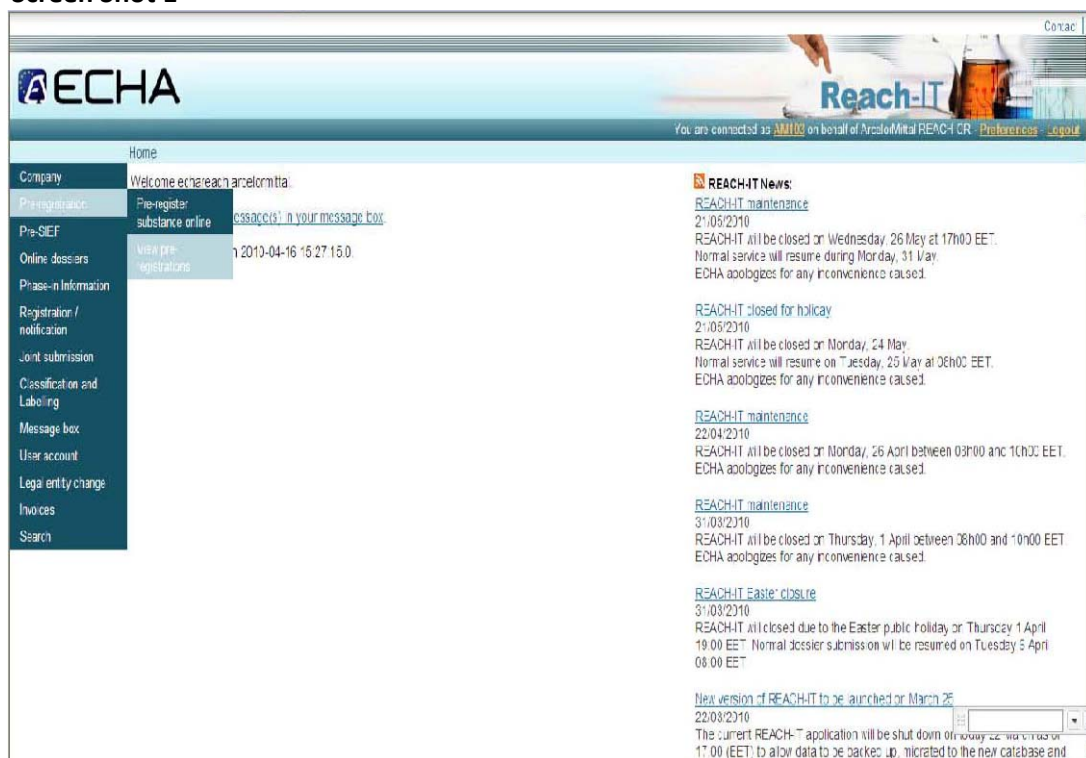

As advised in our Updated [Statement on the Sameness of Iron and Iron, Furnace](#), the Iron Platform has taken the decision to merge these two substances and create a single REACH dossier for Iron [Einescs number 231-096-4, CAS number 7439-89-6].

There does not appear to be a definitive means of merging two SIEF's together in REACH-IT and we therefore recommend that members of the Iron and Iron, Furnace SIEF's join a single Joint Submission - that for Iron. This means that those who have pre-registered Iron, Furnace [Einescs number 265-998-4 CAS number 65996-67-0] will have to join the Iron SIEF and register their substance as Iron.

This should be a simple process. The first step is to update your Iron, Furnace pre-registration in REACH-IT, using the following steps:

1. Go to your account in REACH-IT, search for your pre-registration for Iron, Furnace - you can do this using the substance name or identifier [EC or CAS number] - see screen shots 1 and 2

Screen Shot 1

The screenshot shows the REACH-IT user interface. At the top, there is a navigation bar with the ECHA logo and the REACH-IT logo. Below the navigation bar, there is a sidebar with various links: Home, Company, Pre-registration, Pre-SIEF, Online dossiers, Pre-IEF information, Registration / notification, Joint submission, Classification and Labeling, Message box, User account, Legal entity change, Invoices, and Search. The main content area displays a welcome message and a list of REACH-IT News items, including maintenance notices and holiday closures. A notification at the bottom indicates that a new version of REACH-IT will be launched on March 25, 2010.

Screen Shot 2

Home > View existing pre-registrations

Search pre-registrations

You may search using any of the following criteria:

EC number:	265-998-4
CAS Number:	
Chemical name:	Iron furnace

Search

2. When you see your pre-registration for Iron, Furnace, click on the [pre-registration number](#) [which will be in blue] to view the **Update pre-registration** page- see screen shot 3

Screen Shot 3

Home > View existing pre-registrations

Search pre-registrations

You may search using any of the following criteria:

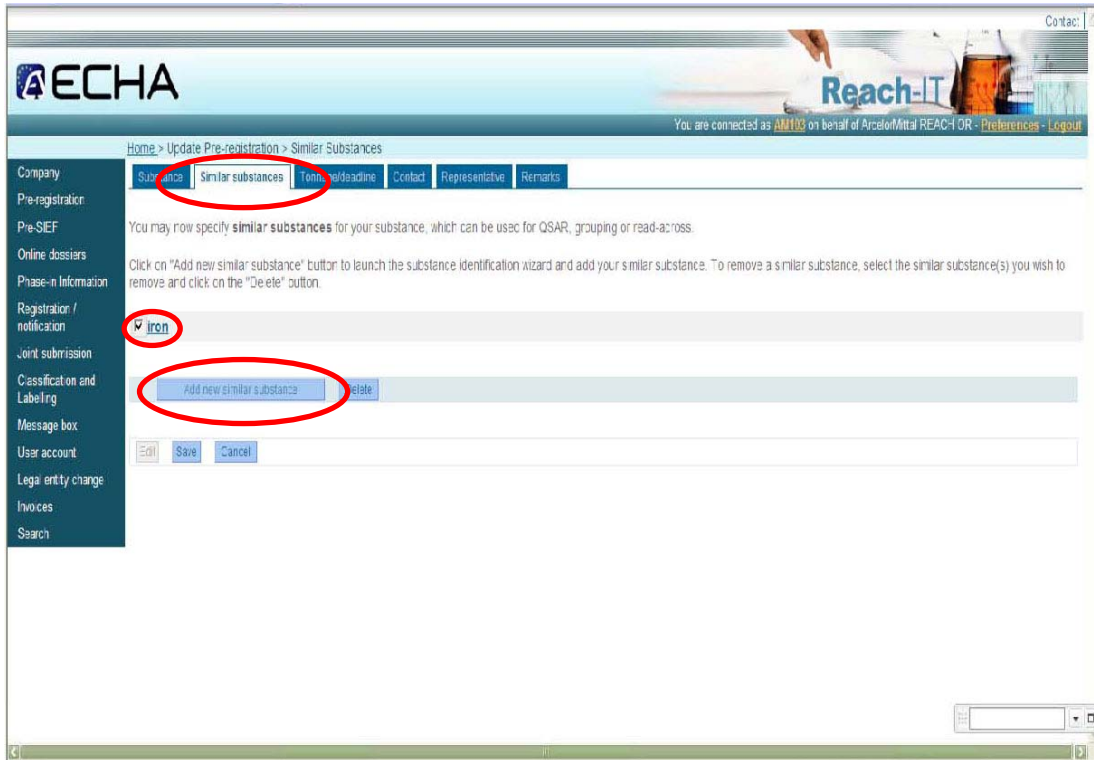

EC number:	265-998-4
CAS Number:	
Chemical name:	Iron furnace

Search

Name	Submission Number	Pre-registration number	Tonnage band	Deadline date	Pre-SIEF Status	Representative	Download report
Iron furnace	DCS13196-59	05-2119382776-25-0C00	Over 1000 tonnes/year	30/11/2013	Active	<input type="checkbox"/>	Go to pre-SIEF

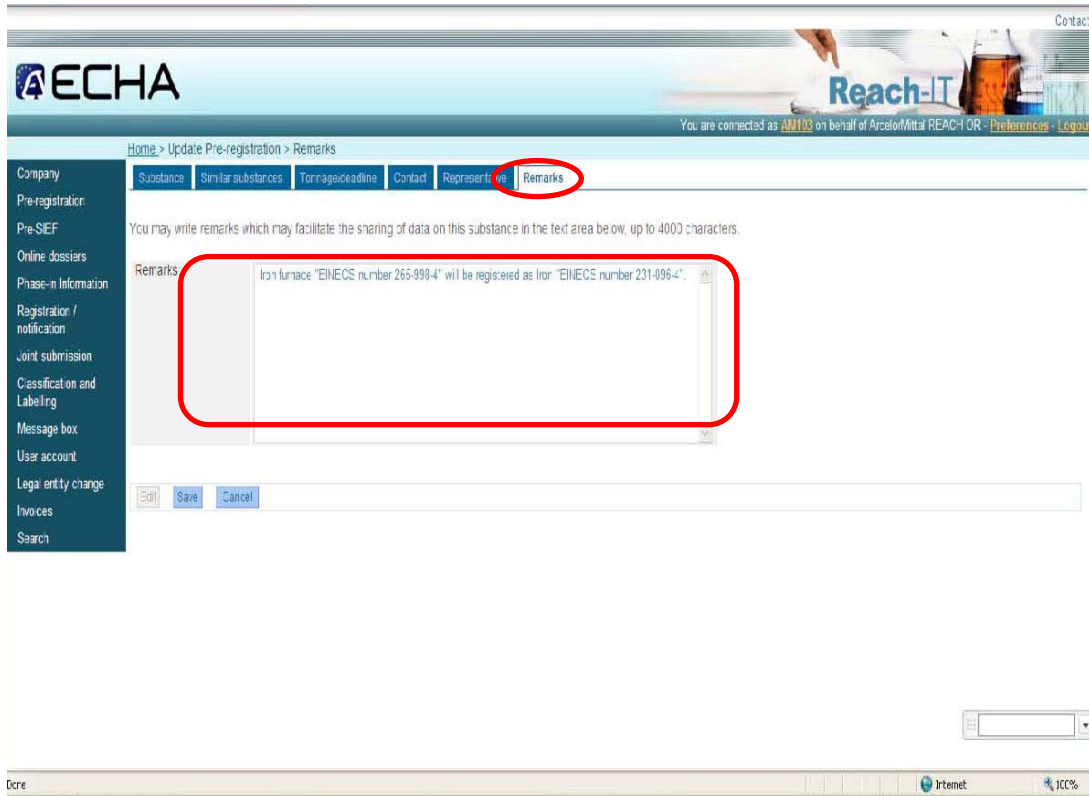

3. Click on the **Similar substances** tab. If you added **Iron** as a similar substance at the time of pre-registration you will see a tick box for Iron - see screen shot 4

Screen Shot 4

4. if you did not add Iron as a similar substance at the time of pre-registration, click on the **Add new similar substance** tab, add **Iron** and save it - see screen shot 4

Screen Shot 5

5. Click on the **Remarks** tab on the **Update pre-registration** page and add the following comment in the **Remarks** box- see screen shot 5:
"Iron, Furnace [Einecs number 265-998-4] will be registered as Iron [Einecs number 231-096-4]"

The Iron Platform, acting on behalf of ArcelorMittal, the Lead Registrant for both substances], will update the list of Iron SIEF members to include pre-registrants for Iron, Furnace and will create a single email distribution list for the enlarged SIEF. No action by SIEF members is required in this respect.

When it comes to completing your IUCLID 5 dossier, in section 1.3 you should add your pre-registration number and a remark about why the identifiers [Einecs and CAS numbers] of the substance being registered are different to those used for pre-registration. This will be covered in the guidance document on completion of sections 1-3 of the IUCLID 5 Iron dossier.
