Substance:

Further to our email dated June 8th 2009, it is looking increasingly likely that we will be able to treat Iron, Furnace and Iron [Einecs number 231-096-4, CAS number 7439-89-6] as being the same for REACH purposes. In order to facilitate eventual merger of the two SIEF's we would be most grateful if you would complete the follow up survey again, this time including a question about sameness with the specification for Iron.

Our apologies for this additional work, but it will save us all time further ahead. If you have multiple legal entities and replied to the first follow up questionnaire for Iron, Furnace and your answers are the same for all your legal entities, just complete this questionnaire once and make an appropriate note in the comments box in question 9 - we will pick up the details from the first survey.

To see the sameness specifications for Iron, Furnace and Iron, please follow the links below

[Iron, Furnace](#)

[Iron](#)

Link to the revised follow up questionnaire

Please follow this link to the [revised follow up questionnaire for Iron, Furnace](#).

Please complete this survey no later than September 25th 2009 - thanks in advance for your co-operation.

REACH registration for specified IRON substances
